

RS: MOTORSPORT

THE ULTIMATE RACING SIMULATOR

Feel every turn

Individual motion actuators control each corner of the motorsport chassis, giving you the most authentic and realistic feel of driving your own race car on the track.

Hydraulic triple pedal system

The OBP E-Sports Pro-Race V2 Hydraulic Pedal System takes your sim racing to the next level with professional-grade performance and precision. Featuring a 10,000 PSI pressure sensor, aircraft-grade T6061 aluminium, and adjustable pedal settings, it delivers real-world feel and durability.

Authentic steering response

The Simucube 2 Sport redefines sim racing steering wheels with exceptional performance. Equipped with a high-torque direct drive motor, it provides ultra low latency, ultra-realistic force feedback.

Precision control

The Jinx sequential shifter, designed to replicate the tactile feel and precision of a Gen2 Australian V8 Supercar. Every shift is a symphony of mechanical perfection, engineered to provide an authentic, race-ready experience.

The hydraulic handbrake delivers an authentic, real-world experience for rally and drift simulated racing. Engineered with a true hydraulic system, it offers smooth and precise control, closely replicating the feel of a real handbrake.

See the difference

The motorsport simulator is delivered with a Racing Sims Cube, a complete turn key solution. This includes a customised high spec gaming PC, with all software installed and configured. Three ultra high definition monitors give the driver a full immersive wrap around view.
